NEW ENGLAND INSTITUTE OF TECHNOLOGY

WINTER 2020

NEIT JOINS THE WORLD OF ESPORTS

Check Out the New Innovative Center at the East Greenwich Campus

ESPORTS CENTERS have become increasingly popular on college campuses attracting students with a passion for gaming. New England Tech is proud to now offer its students the opportunity to compete with fellow NEIT students and teams from other colleges and universities in Esports competitions held around the world. The NEIT Esports Center will advance the university's visibility throughout higher education as well as the game development, production, and digital graphics industry.

Located at NEIT's East Greenwich campus, the Esports Center is open daily for team practices, leagues and free play. The NEIT Esports Club has been established and all New England Tech students are invited to join. The club will first coordinate intramural matches and eventually establish an official NEIT Esports team to compete with teams from other colleges and universities. Some of the games the club members are looking to compete in include Overwatch, League of Legends, Rocket League, Counter Strike, Call of Duty, and Smite. Students interested in joining the Esports Club may contact Jordan Dubreuil, Assistant Professor IT/Game Development, who will serve as the club's faculty advisor at jdubreuil@neit.edu.

The Esports industry continues to grow at a rapid pace, offering NEIT students dynamic career opportunities in gaming design, production, digital graphics and more. Newzoo, a well-respected global research firm, reports that in 2019 the global Esports market generated revenues of approximately \$1.1 billion, up 26.7% year on

year. The global Esports audience could reach 495 million in 2020. On its current path, Newzoo estimates the Esports market will generate \$1.8 billion in 2022.

Because of its growing popularity, industry experts foresee Esports teams having franchise owners like traditional teams in the NFL or NBA. Major Esports competitions attract a

NEIT is committed to offering its students the latest technology available in all of its academic and recreational programs. The Esports Center collaborated with MSI, a world leading gaming brand, to outfit the Esports Center with leading-edge gaming equipment. The Esports computers are all MSI X Plus machines with i9-9900k processors that operate at a speed of 3.6 GHz and all have 32GB of memory. The video board in the PCs is the NVIDIA GeForce RTX2080 Ti, one of the most powerful in the industry. The monitors are specifically made for Esports competitions, running at a 144Hz refresh rate that is needed to support several games. The PC peripherals such as the keyboard, mouse and headset, are the latest in gaming technology.

The new Esports Center positions NEIT among universities with the most advanced digital programs in the country and will result in growing enrollment with new students pursuing a digital education and future career opportunities.

Dr. Douglas H. Sherman, NEIT's Senior Vice President and Provost, stated "NEIT is excited to offer Esports to our students. Esports brings students together teaching them teamwork skills, leadership and good sportsmanship while they have fun doing what they enjoy. We are proud to be joining other colleges and universities that support Esports teams across the country and abroad and giving our students the opportunity to compete globally in this fast-growing online sport."

huge fan base just as traditional sporting events do, so they are held in large scale arenas where thousands of fans watch professional video gamers compete for lucrative prizes and livestreaming deals. Fans can also view Esports events on livestreaming platforms such as Twitch and Microsoft's Mixer.

and good sportsmanship while they have fun doing what they enjoy. We are proud to be joining other colleges and universities that support Esports teams across the country and abroad and giving our students the opportunity to compete globally in this fast-growing online sport."

Building a Career in Construction Management

Karrie Kratz earned a Bachelor of Science degree in Architectural Building Engineering Technology (ABT) from New England Institute of Technology in 2007. Her career began in 1999 at the Glastonbury, Connecticut branch of the Gilbane Building Company where she advanced from accounting clerk to operations manager. In September 2019, Karrie was promoted to Vice President, Operations Manager for the Business Unit of Gilbane's Chicago facility. In this role, Karrie utilizes her strong technical skills and business knowledge to lead construction field teams to execute successful and safe projects. In this role, Karrie also works with the operations team to help develop their own careers. Karrie is a leader in several industry and community organizations and shares her passion for improving the advancement opportunities for women in the construction industry. Karrie shares her success story with Tech News readers.

What made you decide to attend NEIT?

NEIT had both an accelerated schedule as well as flexible class options which fit my full-time work schedule. NEIT's Architectural Building Engineering Technology program was a very appealing option because most courses were taught by faculty who were also professionals in the field. I benefitted greatly from learning through their experiences.

Why did you choose your program?

At the time that I attended NEIT, ABT most closely aligned with my already underway career in construction management.

What did you do to get started with your career?

I joined Gilbane Building Company's accounting department in 1999 as an accounting clerk. It is through that opportunity that I learned about the career path in Construction Management. As I moved from the accounting department to the field operations side of the construction business, I wanted to support my professional development with a degree that was in line with my peers. At that time, I chose to return to higher education at NEIT and pursue my bachelor's degree.

Tell us about your current position.

I am currently a Vice President, Operations Manager for Gilbane's Chicago Business Unit. I lead both field and preconstruction teams through all facets of the construction

process. I work daily on team development and collaboration as well as individual career development with our entire team. I set expectations and goals for our teams' performance and monitor our progress to ensure we're delivering the best quality services to our clients.

What do you feel ultimately prepared you for your position?

I believe that my career path that took me from accounting through field engineering and project management developed me into a utility player. I have learned to understand a multitude of perspectives and value each position's contribution to the overall operation. This well-rounded path combined with Gilbane's leadership development program have served me very well in my current role.

Additionally, I have developed amazing mentors both within my company as well as within the Architectural/Engineering/Construction Industry that have always provided me with sound guidance and advice.

Do you have any advice for graduates who are just beginning their job search?

Spend time interning in multiple facets of the industry and pursue the avenue that hits the intersection of passion

Karrie Kratz sets project direction and takes a moment to mentor Gilbane's Project Manager, Jae Chu

and challenge for you. This is the spot from which you will learn the most and return home with fulfillment.

Your career is a long journey so it's good to set goals on the short term but take time to contemplate the full arc.

What can current students do to better prepare themselves for jobs in this field?

Students can best prepare themselves for a career in the Construction Management field by developing their team building skills as well as working towards being an articulate communicator. All forms of communication are critical in the field: written, informal, verbal, formal presentations including presenting ideas visually and active listening. Construction Management requires you to become a life-long learner and ultimate team player so being comfortable and effective in those behavior sets is essential for success.

A MESSAGE FROM PRESIDENT RICHARD I. GOUSE

Greetings to all,

This year is off to a great start as we launch our new leading edge Esports Center located at the university's East Greenwich campus. NEIT is proud to join other colleges and universities, both in the United States and abroad, who also offer this fast-growing online sport to their students. Our goal is to teach students the importance of teamwork, leadership and fair play while competing with other collegiate teams.

Seventy-five high school students from across the state are enrolled in courses at NEIT through the Advanced Coursework Network sponsored by the Rhode Island Department of Education. This is the fourth year that NEIT has participated in this program. High school students can earn college credits through courses such as Introduction to Drones and UAV Technology, Planning Your Financial Future and OFC/OAW Electric Welding and Cutting.

On February 8th, NEIT hosted the 14th Annual FIRST® Robotics Tech Challenge at our Warwick campus. Students from 28 Rhode Island middle and high schools competed in this action-packed event. The tournament is designed to inspire an appreciation of science and technology. Participants have access to college scholarships through the FIRST® organization.

NEIT will welcome more than 60 employers to the East Greenwich campus on March 4 to the Annual TECHXPO. Current students in Communications, Information Technology and Engineering programs as well as alumni can network with a variety of employers for possible job opportunities.

We also look forward to this year's Commencement Ceremony being held on Sunday, May 3, 2020, at the Dunkin Donuts Center. NEIT's administration, faculty and staff look forward to this event as we witness our bright, hardworking students achieve this great milestone.

NEIT continues to thrive as we look ahead to another successful year.

NEIT'S QUALITY SERVICE STATEMENT

Quality service for students, employees, and customers at New England Institute of Technology is knowledgeable and informed employees working as a team to provide more assistance and information than expected in a caring and professional manner in order to empower the students to achieve their goals.

NEIT's Access Road Campus Has A New Look

NEW ENGLAND TECH'S Access Road campus which is visible from Route 95 has undergone a recent name change. The original signage on the Center for Automotive Technology building has been modified to read "New England Tech Warwick Campus." This name change was implemented to clarify any possible misconception that the Access Road campus is the university's main campus. NEIT's main campus is located in East Greenwich. In addition to offering various Automotive and Auto Collision

Technology programs, the Warwick campus is also home to Criminal Justice, Electrical, Welding Engineering and Marine Technology programs. For further information on the Warwick campus name change, please contact NEIT's Vice President for Strategic Planning, Alan Resnick, at 401-739-5000 or by email at arensnick@neit.edu. Program information may be obtained at www.neit.edu or through NEIT's Admissions Office at 800-736-7744 or by email at NEITAdmissions@neit.edu.

Master of Public Health's Newest Grads

From left: Magali Angeloni, DrPH, Director of the MPH Program; Sarah Lopatka and Deborah Faith, graduate students; and Assistant Professor Henry "Hank" Johnson, MPH Faculty. Not pictured: Samantha Walsh, graduate student

CONGRATULATIONS to Sarah Lopatka, Deborah Faith and Samantha Walsh who earned their Master of Public Health degrees this past December. As part of the curriculum, students are required to deliver a portfolio and Capstone project demonstrating their skills in at least 5 of the 27 public health competencies. The Capstone project encompasses a 20-week process with the first review of the literature and then the development of a comprehensive paper to help advance the student's professional goals. During that process, there is a robust weekly review of the papers to ensure that the rigor, writing and professional quality of the projects are met. A close-to-final draft is also assessed by external independent reviewers, and students are asked to incorporate their feedback. The final step is for students to present their project to a committee of four NEIT doctoral faculty members who evaluate the projects and ask questions.

These three new public health professionals are now ready to begin a new phase of their career. The Master of Public Health degree will help them take new approaches to promote healthier lifestyles in their community. For more information on this program, visit https://www.neit.edu/Programs/Online-and-Hybrid-Degree-Programs/Master-of-Public-Health-Degree-Online

DEAN'S LIST

The following students have achieved academic excellence for the quarter ending December 14, 2019. These full-time students have been placed on the Dean's List for achieving a GPA of 3.6 or higher on a maximum scale of 4.0. Congratulations to all!

From the EPIC Poetry Group

The EPIC Poetry Group at NEIT is a spoken word poetry group that explores, writes, and shares poetry. Events include discussions, writing workshops and open mics. All students are welcome whether to compose, verse or just listen. Enjoy this beautiful poem, "Chasing Kindness" by Amanda Coler, a Video Game Design student.

*My dream for you
 Is to understand you will never lose;
 You will either win or learn.
 Being human comes with an imperfect nature,
 Embrace your imperfections.
 Guide acceptance and love.*

*My hope for you
 Is to nourish your purpose,
 To not let what you cannot do
 Interfere with what you can do,
 To not allow the voice of fear
 Consume your mind.*

*My wish for you
 Is to be stronger than your strongest excuse.
 Help me bring back love and kindness,
 One poem at a time.*

Gaming Students Sharpen Their Skills at Disney World

FOURTEEN STUDENTS from NEIT's Video Game Development and Design Technology program participated in a four-day trip to Walt Disney World with Associate Professor Bill Culbertson and Assistant Professor Jay Aguiar at the end of their winter break in January. The goal of the trip was to study Disney's design techniques for park and attraction layout as they relate to video game level design. "The rides are just like video games," said Culbertson. "The way the Imagineers control what the guest sees, the story development and the immersion of the guest into the story all relate directly to what we teach in our program. Game developers have to lead the player through the game in much the same way."

The students had an opportunity to visit all four parks including the new Star Wars: Galaxy's Edge, Toy Story Land and Pandora.

"The trip was an incredible experience! First and foremost, getting to see Disney's professionalism, attention to detail and innovation is truly a testament to the "Most magical place on earth" slogan," said student Kevin Giron. "As a social experience it was great to interact with the professors and older students on the trip, to be able to ask them questions about the school and industry. Ultimately I can't say enough about how grateful I am to have been on the trip and how well organized everything was."

As a bonus, the students amassed hundreds of texture images while on the trip, photographing interesting surface textures and props for use in their future game development as well as for reference. The most valuable resource, however, will be the memories they have gathered that will add to their educational experience.

Where your former classmates are

The Career Services Office can attest to the fact that they are working in very exciting jobs! We wish them continued success in their careers and all of their future endeavors.

Many NEIT graduates employ NEIT graduates. If you have an opening within your company or know of an opening that would be best filled by an NEIT graduate please contact Pat Blakemore, Director of Career Services, at 800-736-7744 or 401-739-5000. There is no fee for any referrals.

Graduates of New England Institute of Technology or New England Technical Institute are automatically members of the NEIT Alumni Association. Your participation in the Alumni Association is critical to its success. Please consider becoming an active member of this important organization. And the best news of all: there is no fee for membership. To join please call 401-739-5000, ext. 3704.

From left: Kenneth Dorgan, Wayne Witter, Piper Ferris, Andre Girard and Tyler Welch are pictured with their professional-quality cabinet unit.

Cabinetmaking Students Showcase Their Talent

FIVE TALENTED STUDENTS enrolled in NEIT's Building Construction and Cabinetmaking program worked as a team to complete a beautiful cabinet unit that is on display at the Post Road campus. Kenneth Dorgan, Piper Ferris, Andre Girard, Tyler Welch and Wayne Witter, all term six students, worked both independently and as a team producing the department's first-ever group project!

Each student was assigned a section to complete. Andre and Piper each produced the base cabinets, Tyler and Ken each constructed an upper bookshelf and Wayne worked on the center bench seat. Before any construction began, the students drew a rough sketch of their cabinet section. Then they designed it using "Sketch-Up", a 3D modeling software program. The students then had to complete an estimate for the cost of materials and their labor. They also had to prepare a plan and procedure list which is a step-by-step outline that lists the materials, tools and tasks that are

required to complete the assignment. Students also developed a cut list which shows the various types of wood being used for each component along with rough and finish cut measurements.

Once each section was completed, the students had to spray paint their piece. Together, they assembled the five sections into one beautiful masterpiece! The project took approximately 10 weeks to complete. Department Chair and Assistant Professor, Joe Sepe, along with instructors/lab assistants, Wallace Auclair and Dave Kiernan, could not have been more proud of the students' creativity, precision and teamwork.

Now these students are working on their final Capstone projects each choosing a piece of furniture that they can use in their homes. Tyler chose a bookcase with drawers, Andre is constructing a Japanese inspired garden bench, Ken is building a workbench, Wayne is making an entertainment console and Piper is working

on a blanket chest. The Associate in Science Building Construction Technology program offers two tracks: Building Construction and Cabinetmaking and Building Construction and Design which covers topics in residential, commercial, building, cabinetmaking and design trades. Computers are used in estimating, designing and manufacturing components. For more information on this program, contact the Admissions Office at 800-736-7744, email NEITAdmissions@neit.edu or visit <https://www.neit.edu/Programs/Associate-Degree-Programs/Building-Technologies/Building-Construction-Technology>.

NEIT's Launches New Health Science Program

NEIT'S NEW Associate in Science degree in Health Science is an introduction to the health sciences and the job opportunities that are available in healthcare fields. This program introduces students to fundamental concepts in the sciences and healthcare disciplines and the skills that are relevant to each discipline through a general healthcare degree track. The Health Science program also prepares students for entry into the following NEIT associate degree programs: Nursing, Occupational Therapy Assistant, Physical Therapist Assistant, Respiratory Care, Surgical Technology, Medical Laboratory Technology and Veterinary Technology.

The Health Science curriculum focuses on introductory courses in anatomy and physiology, biology, medical terminology, electronic medical records and healthcare informatics. Graduates of the Health Science degree program are well-prepared for entry-level positions in the healthcare field, or to continue their studies in NEIT's Bachelor of Science degree program in Business Management with a Healthcare Management Concentration or in Rehabilitation Sciences.

For additional information on any of NEIT's associate, bachelor's, master's and doctoral health sciences programs, please contact the Admissions Office at 800-736-7744, email NEITAdmissions@neit.edu or visit the website at www.neit.edu.

NEIT's Online Programs Receive High Marks by Intelligent.com

THREE of New England Tech's online programs have received top rankings by Intelligent.com. They include the RN to BSN program and the Bachelor of Science in Criminal Justice program. In addition, the Master of Science in Construction Management program was also recognized.

Intelligent.com, is a trusted resource for online degree rankings and higher education planning. Its comprehensive research guide is based on an assessment of accredited colleges and universities across the country. Each program is evaluated based on curriculum quality, graduation rate, reputation and post-graduate employment. The 2020 rankings are calculated through a unique scoring system which includes student engagement, potential return on investment and leading third party evaluations. The methodology also uses an algorithm which collects and analyzes multiple rankings into one score to easily compare each university.

NEIT's RN to BSN program ranked #4 on the Top 60 RN to BSN Degree Programs for 2020. The Criminal Justice program ranked #7 on the Top 60 Criminal Justice Degree Programs for 2020. The Master of Science in Construction Management program placed #29 on the Top 50 Construction Management Programs for 2020 from the 139 programs assessed. All three programs were recognized as "Best in the Northeast."

To learn more about NEIT's online bachelor's, master's and doctoral degree programs, please visit <http://www.neit.edu/Programs/Online-and-Hybrid-Degree-Programs>, call the Admissions Office at 800-736-7744 or email NEITAdmissions@neit.edu.

Evidence of the imagination, curiosity and creativity of all members of the NEIT community.

NEIT Hosts Automotive Competition

THE ANNUAL Ocean State Automotive Contest provides high school seniors the opportunity to demonstrate their technical abilities in the automotive field. The contest is hosted by NEIT's Automotive Technology faculty in cooperation with the Rhode Island Automobile Dealers Association.

The competition incorporates various workstations in which students must complete certain tasks or troubleshoot technical "bugs". The workstations include braking systems, steering and suspension systems, electrical and electronics systems, heating and air conditioning, engine repair, parts identification and engine performance.

Teams of two high school seniors from various Rhode Island high school career and technical education centers have 15 minutes to complete each workstation. The winning teams receive prizes from Snap-On tools and schol-

arships from NEIT. The first-place winners were awarded a one-year tuition scholarship, the second-place winners received a \$1,500 tuition scholarship and the third-place winners earned a \$1,000 tuition scholarship. The first-place team will represent Rhode Island at the National Automotive Dealers Competition in New York this April.

Congratulations to the 1st Place Winners from the Warwick Area Career and Technical Center, Lynn Guichik and Ian Donohue; 2nd Place Winners from East Providence Career and Technical Center, Zachery Bento and Mary Ellen Pinson; and 3rd Place Winners, Coventry Regional Career and Technical Center, Josh Weeks and Jaden Gonsalves.

Special thanks to Herb Gowdey, NEIT's Automotive Technology instructor and Amanda Metzger, Admissions Manager, for their assistance in ensuring a successful competition.

SAVE THE DATES

AUTOMOTIVE WEDNESDAYS FOR NEIT STUDENTS

February 26 and March 4 • 10:00 am - 12 noon

(More dates to come)

Center for Automotive Technology Warwick Campus

Annual TECHEXPO FOR NEIT STUDENTS AND GRADS

Wednesday, March 4, 2020 • 9:30 am - 12:30 pm

Tech Way, East Greenwich Campus

COMMENCEMENT 2020

Sunday, May 3, 2020 • 11:00 am

Dunkin' Donuts Center

TECH NITE OPEN HOUSES

Tuesday, April 14, 2020 and Tuesday, August 4, 2020 from 3:00 to 7:00 p.m.

Tours begin at the East Greenwich Campus located at One New England Tech Blvd.

The Go Baby Go Program Benefits Children and NEIT Students Alike

NEIT FACULTY AND STUDENTS from the Mechanical Engineering, Electrical Engineering, Electronics, Robotics and Drones Technology and Occupational Therapy Assistant programs joined forces with representatives from the Go Baby Go program to assist children with mobility issues. The Go Baby Go initiative began at the University of Delaware and has now expanded globally. The program provides modified, ride-on cars to young children with physical challenges so they can move around independently to play and socialize with their peers.

Rick Linet, representing the Go Baby Go program, contacted NEIT to determine the university's interest in participating in this unique program. Mr. Linet presented the idea to NEIT Engineering and Occupational Therapy faculty, and everyone was excited to learn about the clinical benefits to the children of Rhode Island as well as the academic benefits to NEIT students.

Faculty members included Dean Plowman, Department Chair and Associate Professor for Mechanical Engineering and Welding Engineering; Jennifer Hurley, Associate Professor, Mechanical Engineering; Anthony Coelho, Assistant Professor, Electrical Engineering; and Joseph Gundel, Adjunct Professor, Electrical Engineering who assisted their students Adam Arias, Fadi Assi, Mohamed Bader, Anthony Garcia, Christian Charlemagne, Tybreanna Jackson, Darpan Patel, Erickson Ramos and Manny Tavares. They were joined by faculty and students from the Occupational Therapy program that included Dr. Carol Doehler, OTD, OTR/L, FAOTA, Department Chair and Professor, Occupational Therapy, Rehabilitation Science and Health Science programs; Cyndi Fuchs OTR/L, Assistant Professor; Julie Laird OTD, OTR/L Instructor/Teaching Assistant; and Elizabeth Remillard MS, OTR/L, Academic Fieldwork Coordinator along with students Maeve Anderson, Maggie Kennedy and Ariana Silva.

Occupational Therapy Assistant (OTA) faculty and students visited the children at home and videotaped them at play to determine their capabilities. The Engineering team then viewed the videos to determine the modifications specific to each child. The goal was to give the children the ability to control both the movement and steering of the cars with

their hands using either a joystick or a push button sensor system. With faculty guidance, the Engineering and OTA students met for approximately eight weeks to complete the car modifications.

The students assisted the children with the operation of their cars at the Build Day presentation held on November 17 at NEIT. It didn't take long for the happy children to drive off on their own around a colorful racetrack built by the students. For the first time, the children experienced a sense of independence that they had not had before, so their families were ecstatic!

Faculty and students are gearing up to build four to five cars for the next Build Day scheduled for the spring of 2020. Visit <https://www.youtube.com/watch?v=xV0ulrjcM8U&feature=youtu.be> to see the children in action.

Students and faculty work together to modify ride-on cars for young children with mobility issues

The 11th Annual New England Tech Scholarship Golf Tournament will be held on Tuesday, June 23, 2020, at the Alpine Country Club in Cranston, RI. Proceeds from the tournament benefit NEIT students in need of financial assistance to complete their education. The day will begin with a breakfast buffet at 7:15 a.m. with a shotgun start at 8:30 a.m. followed by an awards luncheon at 1:30 p.m. Registration information will be posted on the NEIT website in the coming weeks. In the meantime, contact Steve Kitchin, Vice President, Corporate Education and Training, by email at skitchin@neit.edu or call 401-739-5000 ext. 3433 for details.

NEW ENGLAND INSTITUTE OF TECHNOLOGY
THE CENTER FOR TECHNOLOGY AND INDUSTRY

All Autodesk® Training Programs are conducted at our East Greenwich, RI campus.

AutoCAD Fundamentals

Course Length: 32 hours

Course Abstract:

- Understanding the AutoCAD workspace and user interface
- Use basic drawing, editing, and viewing tools
- Set up layers, blocks, styles & templates
- This course covers the indispensable core topics for working with AutoCAD

AutoCAD Advanced

Course Length: 24 hours

Course Abstract:

- Advanced Text Objects and CAD Management & System Setup
- Creating Tables
- Defining dynamic blocks and attributes
- Create Sheet Sets
- Enhancing productivity with interface customization

AutoCAD Update

Course Length: 10 hours

Course Abstract:

- Introduces new features of AutoCAD to users of previous versions.

AutoCAD Architecture

Course Length: 24 hours

Course Abstract:

- Viewing in 3D
- Design development & construction features
- Basic wall construction and creating wall openings, floors, roofs, fixtures, furnishings & equipment

Autodesk Revit Architecture Fundamentals 32 hours

Course Abstract:

- Understanding the purpose of Building Information Modeling
- Work with basic drawing and editing tools and add walls, floors and roofs to the building model
- Create levels and grids as datum elements for the model
- Set up sheets for plotting with test, dimensions, details, tags and schedules

Autodesk Inventor™

Course Length: 24 hours

Course Abstract:

- Create 2D sketches with sketch & editing tools
- Constraining & dimensioning sketches
- Generate 3D parts from sketches
- Part modeling

Autodesk 3ds Max Design Fundamentals

24 hours

Course Abstract:

- Introduction to Autodesk 3ds Max Design interface, workflow and project configuration
- 3D modeling from 2D objects
- Lighting (and lighting with Max Mental Ray)
- Animation for visualization
- Rendering

Autodesk® Maya® Fundamentals

Course Length: 24 hours

Course Abstract:

- Introduction to the user interface and project creation
- Work with polygon modeling and NURBS modeling
- Lighting, materials, shading and the UV Texture Editor
- Cameras and rendering

Features of New England Tech's Autodesk Authorized Training Center

- One workstation per participant – Guaranteed!
- Limited to 12 participants per course – Register early!!
- Instructors are Autodesk® approved to deliver training.
- Autodesk® certified training materials are included in the course tuition.
- 100% satisfaction or retake the training again at no charge.
- Customized on-site training can be developed for your organization.
- Open lab hours are available to registered participants.
- Discounts available for graduates and current students of New England Institute of Technology.
- Discounts are available to corporations for multiple enrollments.
- Additional dates available for corporate accounts.
- Selected courses are also available as online e-learning programs.

For more information contact:

Business Management Students Earn Industry Awards

NEIT'S BUSINESS MANAGEMENT students participated in the Society for Advancement of Management's (SAM) first annual Three-Minute Thesis competition. Originating at the University of Queensland in Australia, this competition provides students the opportunity to share their academic research with an audience of non-content specialists. More than 25 students participated in this new program.

NEIT student presentations ranged from creating and designing a tiny house community in Warwick, Rhode Island to combat homelessness to improving communication with autistic patients. Winners were determined by a panel of judges representing various academic majors. Additionally, an award

was presented by a vote from the audience for the "People's Choice". Congratulations to the NEIT Undergraduate Division winners Riley McKenzie and Alexandra Weeman and also to the Graduate Division winners Courtney Bucci and Kyle Potter.

"SAM's mission is to increase management skills and expertise through participation in programs and services designed to improve the professional quality of their knowledge, performance, and leadership ability," said Sarrah Berkery, NEIT's SAM Club President. "This competition brought students together from many different academic disciplines and embraced the spirit of SAM's commitment to learning and innovation."

NEW ENGLAND
TECH
STUDENT ACTIVITIES

Meet new people! Learn new things!
Check out the list of student activities...

For information about any of these activities or events, please contact:
Melissa Hague, Student Activities Director, at 739-5000 ext. 3565, or email mhague@neit.edu,
or Abigail Hancock, Student Activities Coordinator, at 739-5000 ext. 3418, or email ahancock@neit.edu.
Stop by the Student Activities Suite on the EG Campus, S119-S120B.

WHAT'S HAPPENING...

WINTER PAST EVENTS:

Students are having a great time at our weekly bowling league.

Students were "Bruin' Up" their excitement with the overtime/shoot-out win at the Providence Bruins Hockey trip this past November.

Everyone having a great time at the end of term Final Frenzy Holiday Party.

NEIT's friends from Paws from the Heart therapy dogs are always welcomed on campus by our students.

80's Themed Bingo took us back in time!

Thank you to NEIT's Chef Tim from Chartwells Dining Center for providing a tasty spread at our Island Night.

Students enjoyed an evening of tasting and socializing at our food "Bar Crawl" night.

All enjoyed an afternoon of climbing at Rock Spot!

also:
Students kicked off Super Bowl weekend on January 29th at the SUPER BOWL-THEMED BINGO!

The **CALL OF DUTY TOURNAMENT** held on **January 30th** was a hit! We are excited to see more tournaments in the future!

MYSTERY GAME NIGHT was on **January 31st!** Don't miss our next one on **February 29th!**

Check your Student email and the calendar on the Student Website for Student Activity announcements

UPCOMING EVENTS:

For more information on the upcoming events below, please contact Abby Hancock at ahancock@neit.edu or check the NEIT Student Website

FEBRUARY EVENTS

YAWGOO SNOW TUBING TRIP

FEBRUARY 21ST LEAVING EG AT 5:45PM

Nothing says winter like Snow Tubing! Come join Student Activities for a trip to the mountain! Students can sign up in the Student Activities Suite. This trip is \$8 and includes transportation and passes into the park. Dress warm!

For more information visit the Student Activities Suite or email Abby Hancock at ahancock@neit.edu

FIFA20 TOURNAMENT
February 22nd 7pm

CHILL OUT BINGO
February 28th 7pm

MYSTERY GAME NIGHT
February 29th 7pm

MARCH EVENTS

FINAL FRENZY
March 6th 7pm

RETRO VIDEO GAME/ BOARD GAME NIGHT
March 7th 7pm

INTRAMURAL SPORTS

UPCOMING SPRING TERM LEAGUES

NEIT's intramural sports are open to all currently enrolled students. Participating in intramurals is a great way to meet new people, stay active and unwind from studying!

ULTIMATE FRISBEE
Sign up by emailing Theresa Bellinger, tbellinger@neit.edu

BASKETBALL LEAGUE
Sign up by emailing Melissa Hague, mhague@neit.edu
